

Investment Foundation Swiss Life

Equity Global Protect Flex (CHF hedged)

Investment strategy

- Rule-based active equity strategy with complementary hedging strategy
- The investment universe of the investment group comprises companies from the main foreign stock market indices (in particular S&P 500, EuroStoxx 50, FTSE 100 and Nikkei 225) as well as the SMI; weighted by market capitalisation, or an alternative weighting scheme (e. g. equal weighting or minimum volatility)
- Foreign currency risks are at least 90 % hedged against Swiss francs
- Investments may take the form of participation securities, collective investments or derivative instruments
- The additional use of a hedging strategy involving options has the effect of reducing price losses in the event of heavily falling markets and limiting upside potential in the event of sharply rising markets ("put/spread collar")
- Depending on market assessment, the sale of the put option and/or of the call option may be waived
- Implementation via investment in Swiss Life Funds (CH) Equity Global Protect Enhanced (CHF hedged)

Product information

Swiss security number	31952442
ISIN	CH0319524424
LEI	254900LUAQC3MC0MWL48
