

Swiss Life Investment Foundation

Equity Protect Foreign PM (CHF hedged)

Investment strategy

- Indexed investment complemented by a rule-based hedging strategy
- Investment universe made up of companies in the major foreign stock market indices (S&P500, Eurostoxx50, FTSE100 and Nikkei225) as well as the SMI; weighted by market capitalisation), whereby foreign currency risks will be at least 90% hedged against Swiss francs
- Investments may take the form of participation securities, collective investments or derivative instruments
- Company limitation: 5%
- The additional use of a hedging strategy involving options has the effect of reducing price losses in the event of heavily falling markets and limiting upside potential in the event of sharply rising markets ("put/spread collar")
- Liquid assets held for the derivative instruments used can be placed in the money market

Product information

Swiss security number	13016965
