

Swiss Life Investment Foundation

Equity Protect Switzerland PM

Investment strategy

- Indexed investment complemented by a rule-based hedging strategy
- Investment universe made up of companies in the Swiss Market Index
- Investments may take the form of participation securities, collective investments or derivative instruments
- Company limitation: 5% (exception: if represented in the index, minimal deviation from the index weighting)
- The additional use of a hedging strategy involving options has the effect of reducing price losses in the event of heavily falling markets and limiting upside potential in the event of sharply rising markets ("put/spread collar")
- Liquid assets held for the derivative instruments used can be placed in the money market
