Who we are

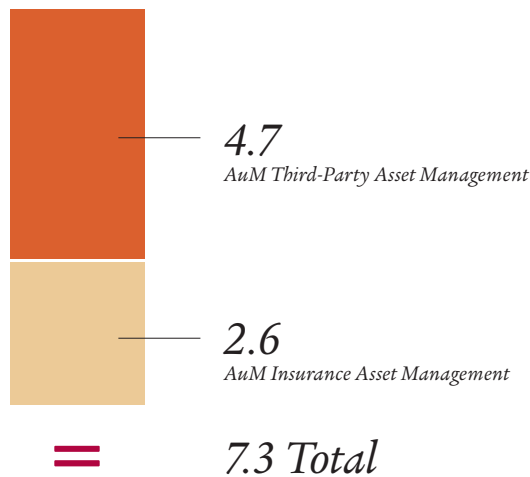

We are a leading European asset manager with locations in Switzerland, France, Germany, Luxembourg, the UK and Norway. Established in 2011, the Swiss Life Asset Managers Infrastructure Equity platform identifies, acquires and actively manages investments in infrastructure assets and companies, and offers institutional investors efficient access to a diverse infrastructure universe. We offer our clients investment solutions that we have already successfully implemented on our insurance balance sheet, thereby providing them with unique access to the infrastructure market. Investors benefit from our in-depth knowledge of the sector, our strong, established global networks and our substantial, long-term engagement. This is how we support our clients in achieving their long-term investment objectives, which in turn also take account of their client's needs so they can plan their financial future in a self-determined manner.
